BENJAMIN D. PARAGAS, PH. D., CESO III
Director IV/Regional Director
Department of Education, Region II

Dear Sir:

ACATECH Aviation College Tuguegarao, is an Aviation Maintenance approved by Civil Aviation Authority of the Philippines that aims high in providing quality aviation education for tomorrow's technology in the field of Aviation.

We are conducting a marketing program that aims to promote competent and timely courses, providing aspiring students information about our school and the advantages of choosing aviation courses in the fast growing aviation industry here in the Philippines and in other countries.

In this regard, we are seeking your permission to allow our institution to conduct Career Orientation in High Schools here in Tuguegarao City and all over the Region. We also want to ask from your good office directory of schools that offers Senior High School. Your support for our undertaking will help us reach the youth of this Region who aspires and dreams to be part of the aviation industry.

Your positive and favourable response is highly appreciated. Thank you very much!

Respectfully yours,

CHARITY O. TRANQUILINO
Officer in Charge

March 8, 2024

To: Schools Division Superintendents

Greetings!

Please see attached letter request for your information and appropriate action.

CLMD-RO2 will provide the requested data to the requesting entity via email.

BENJAMIN D. PARAGAS PhD, CESO III
Director IV/Regional Director

"Providing Quality Support Services for Tomorrow's Technology"

COMPUTER-BASED TRAINING:

ACATECH AVIATION COLLEGE adopts a Computer Based Training Program tailored fit for maintenance of air transport aircraft and basic skills training through computer simulation prior to hands on training. The program includes the use of computer simulated training, access on electronics manuals for aircraft maintenance. In addition, a virtual instructor and simulated systems, description and operation, familiarization and troubleshooting.

ON-THE-JOB TRAINING:

Upon the completion of the course students will be sent to different aviation companies for hands-on training for six (6) months before declaring them a graduate for their course in accordance with Civil Air Regulation Part 3

OJT is required in taking up the licensure exam for A&P and Aircraft Specialist.

TRAIN AND HIRE PROGRAM:

The Train and Hire Program is designed to help the students land a job after graduation. This includes hands-on and practical experience in actual aircraft maintenance and repair. The job employment varies depending on the students' performance during training for various companies here and abroad.

COURSES OFFERED:

ACATECH AVIATION COLLEGE now offers a comprehensive aviation maintenance program leading to:

- 3 - Year Aircraft Maintenance Technology / Engineering with License
- 3 - Year Aviation Electronics Technology / Engineering with License

A licensed Aviation Maintenance Technician will be trained to perform maintenance, inspection repair of all aircrafts to be used by commercial airlines, corporate jets, aircraft charter operators, flight schools, air ambulance, and various agencies. Aviation maintenance technician opportunities are in demand not only in the Philippines but throughout the world. These jobs offer great pay benefit packages, including free world-wide travel packages.

HOW THE PROGRAM WORKS:

A three-year diploma course in Aircraft Maintenance Technology and Aviation Electronics is currently offered by ACATECH AVIATION COLLEGE located at Tuguegarao City. The said program is CAAP approved. The schedule of classes starts from 8:00 a.m. onwards and evening classes are also available.

The program is divided into learning blocks which comprised of classroom, computer-based training and shop instruction that provides over 3,500 hours of technical instruction. Students will be given hands-on training from licensed and experienced instructors who have worked and undergone training in countries like the US, UK, Singapore, Germany, Taiwan, and other countries. Usually, the students will finish the high quality, affordable program in just four (4) semesters.

COMPREHENSIVE LEARNING:

Students will learn everything they need to know to qualify for CAAP qualification and attain an entry level position in the field of Aircraft Maintenance. The variety of skills include sheet metal repair, engine overhaul, electrical communication, navigation and instrument repair, hydraulics, air conditioning, pneumatics, on board maintenance and many more.

The subjects are broken down into blocks and presented in a logical segment of information to provide the students an ample opportunity to excel.

BOEING 737-200 AIRCRAFT:

ACATECH AVIATION COLLEGE the only aviation School in the Philippines that owns BOEING 737-200 AIRCRAFT essential for post graduate maintenance training, thus, students will become work ready technicians and engineers.

HOW TO QUALIFY:

Students must have the desire for learning to be able to enter the field of Aviation Maintenance Technology. No pre-requisites, no prior experience or previous educational requirements needed. This is an equal opportunity college
